LQ 1050 Printing Blanket

- LQ 1050 is designed for sheetfed offset press with a production speed ranging from 8K-10K sheets per hour.
- High solvent resistance and smooth surface finish ensure high quality reproduction across a wide range of substrates
- Thicker compressible layer ensure uniform print pressure in awide range of press configurations and across all format sizes

LQ 1090 Printing Blanket

- LQ 1090 High speed type blanket has beem specifically developed for sheetfed offset press with a production rate of 12K sheets per hour.
- Surface rubber resists cutting and edge marking to provide long blanket life
- Good smash recovery from paper and board damage further enhances this product's value-for-money status

LQ 801 UV Printing Blanket

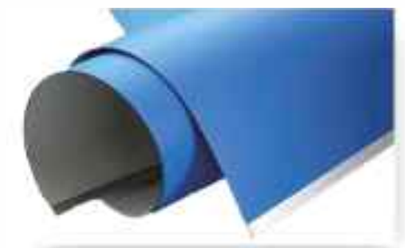

- LQ 801 UV type blanket is specifically designed for high-speed UV sheetfed offset presses with a minimum operating speed of 12,000 sheets per hour
- Reduced swelling and embossing with UV inks
- Optimum ink lay-down for great solids and sharp halftones
- Greater resistance to smashes and on-press damage
- Easy clean-ups

NI627 Butyl-plastic pot and container printing

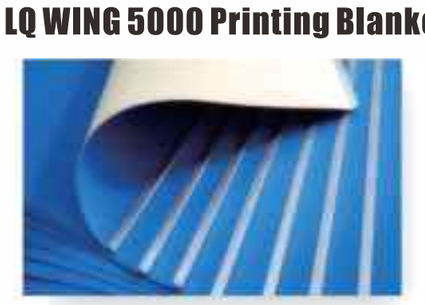

- Traditional soft butyl surface designed for use with modern UV curinginks and cleaning solutions.
- High quality and durable, provides extra robustness.
- Soft surface can enhance ink transfer on difficult materials and profiles.
- Specially designed for ketone and UV curing inks.
- High quality and durable, provides extra robustness.

LQ WING 2000 Printing Blanket

- LQ WING 2000 economical type blankmt has been specifically developed for sheetfed offset presses operating at a speed of 7000
- Moderate compressible layer prevents the displacement of machine images and minimizes edge marking.
- Suitable for: Sheetfed Packaging, Sheetfed
- Commercial, Coating/Varnishing.

LQ WING 5000 Printing Blanket

- LQ WING 5000 Type Printing Blanket has been developed specifically for sheetfed offset presses operating at a speed of 15,000 sheets per hour
- Optimal compressible layer minimizse machine movement and resists cutting edge marking in the image
- Suitable for: Sheetfed Packaging, Sheetfed
- Commercial, Coating/Varnishing

LQ WING 5306 UV Printing Blanket

- LQ WING 5306 UV Type Printing Blanket has been specifically developed for sheetfed offset presses operating at a speed of 10,000 sheets per hour
- It is appropriate to package and matcal UV printing UV solidification and ultravloiet rays resistant
- Resists swelling and embossing from UV inks
- Convenient use,low thickness reduce for good print quality

BLANKET WITH ALUMINUM BAR

- Heidelburg press
- Roland Press
- Harris press
- KBA pressSolna press
- Komori press
- Ryobi press
- Mitsubishi press
